

# United Nations Propaganda

By Karen Schumacher, April 11, 2020

As discussed in the Event 201 pandemic [game](#), removing "disinformation" was considered, especially on social media, while making sure only legitimate information was provided. It appears that particular solution might be in play regarding the COVID 19 "pandemic".

A video by Jerry Day, Is COVID-19 Even Real, was posted on You Tube and subsequently [removed](#) for "violating You Tube's Community Guidelines". The video concerned a Global Research [article](#), Manufactured Pandemic: Testing People for Any Strain of a Coronavirus, Not Specifically for COVID-19, which outlined how COVID 19 testing, as stated in the title, is not specific to that virus. Mr. Day went on to describe how our economic system is being devastated as a result of this "pandemic".

An outfit called Health Feedback posted their own [article](#) on the same day as the Global Research article, declaring Mr. Day's video and the article itself were both "inaccurate", citing "no data or information to support its claims" as one of the reasons. While it is true that the scientist who declared the COVID 19 testing as faulty chose to remain anonymous, why would the article's author choose to write about something so audacious?

The answer lies in the United Nations (UN) and its propaganda censorship activities. Health [Feedback](#) is a "worldwide network of scientists sorting fact from fiction in health and medical media coverage. Our goal is to help readers know which news to trust." Looking at the About link, the name changes from Health Feedback to Science [Feedback](#). One of its [partners](#), Credibility [Coalition](#), also works on finding solutions to "disinformation".

It just so happens that Health Feedback is "a [member](#) of the WHO-led project Vaccine Safety Net (VSN)" with Science Feedback being the "parent organization" to Health Feedback. So it is only [scientists](#) from Science Feedback that have the expertise to determine what is legitimate or not, and somehow have the ability to remove, or perhaps influence removal of that information, on what they deem isn't true or accurate. The World Health Organization (WHO) [VSN](#) "is a global network of websites, established by the World Health Organization, that provides reliable information on vaccine safety." So WHO's solution to misinformation is

to participate in censoring or countering any opposing information? Looks that way.

Why would anyone in their right mind trust any organization that [threatens](#) more "body bags" when challenged? If there was ever a clue as to how despotic this and other UN organizations are, give reason to question its motives and what really might be behind this "pandemic", it is in those words. What exactly does he mean?

ISD Global, in which the US Department of State is a [partner](#), as well as the UN Development Programme ([UNDP](#)), came out with its own Disinformation Briefing [report](#) that frequently referenced those who are "right wing", "extreme right", promoting "conspiracy theories", with many other descriptions such as bigotry and racism, recommended "The best answer to disinformation on health issues is to flood the information space with evidence-based accurate information in digestible formats."

What all of these nitwits don't understand is that they themselves have posted the accurate and reliable information that validates their covert activities to manipulate the public and give reason as to why they shouldn't be trusted either.

Fortunately, the video, **IS COVID-19 EVEN REAL**, has been posted again on BitChute, everyone is encouraged to watch it and have the opportunity to decide for themselves.
